END-TO-END TALENT LIFECYCLE PLATFORM

The Complete Operating System for University Internships

InternFlow is the unified B2B platform transforming chaotic university internships into an accountable talent pipeline—from verified candidate screening and binding offer commitments to effortless weekly logbook supervision.

80%
Reduction in HR Pre-Screening Hours

0%
Start-Day Candidate Offer Ghosting

60s
Weekly Mentor Logbook Inspection

Stage 1: Pre-Hire Smart Match
Direct OCR transcript parsing, GPA validation & automated match thresholds (≥80%).

Stage 2: Single-Commitment Protocol
Auto-declines competing offers upon student confirmation; guarantees 100% reporting.

Stage 3: 1-Minute Drawer & Rubrics
60-second weekly sign-offs with auto-generated university-accredited rubrics.

B2B ENTERPRISE TALENT INFRASTRUCTURE

Who Experiences the Severe Friction?

A two-sided enterprise platform connecting corporate recruiters with accredited universities.

Corporate Employers

Primary ICP & Budget Holder (B2B SaaS)

- ✓ **Mid-to-Large Enterprises & Tech Scale-Ups:** Hiring 10–50+ student interns every academic semester.
- ✓ **Heads of People & Technical Recruiters:** Drowning in unverified resumes, suffering from 30+ wasted screening hours per hiring sprint.
- ✓ **Engineering & Department Mentors:** Frustrated by candidate no-shows on start day and fatigued by retroactive paper logbooks.

💼 **Value Driver:** Predictable, fraud-proof talent pipeline without operational drag or reneged offers.

Universities & Students

Ecosystem Partners & Supply Engine

- ✓ **Thai University Faculties & CWIE Offices:** Enforcing mandatory 16-week (480+ hour) internships for degree accreditation.
- ✓ **Curriculum Deans & Co-op Coordinators:** Desperately need digital evaluation rubrics to replace manual paper binders.
- ✓ **Undergraduate Students:** Want authentic enterprise internships with guaranteed mentor guidance and fast offer confirmations.

📊 **Market Scale:** Over 110,000+ Thai undergraduates enter mandatory CWIE internships annually across 150+ institutions.

THE DISCONNECTED INTERNSHIP JOURNEY

Initial Problem or Opportunity

Why traditional early-career recruitment collapses under institutional scale.

01 / INITIAL ASSUMPTION

"Employers Just Need More Candidate Volume"

Generic job boards push hundreds of unvetted applications into recruiter inboxes. However, high applicant volume actively paralyzes hiring teams when over 80% of student resumes contain self-reported, unverified credentials.

⚠ **Breakdown:** More resumes equals more screening waste, not higher quality.

02 / OPERATIONAL REALITY

The Complete Lifecycle Breakdown

The internship journey is fragmented across disconnected email threads, physical paper binders, and LINE chat groups. With zero accountability mechanisms, candidates hoard multiple concurrent offers and ghost companies on day one.

⚠ **Breakdown:** Teams prepare laptops and roadmaps only to face empty desks.

03 / MARKET OPPORTUNITY

The Need for an Operating System

As Thai higher education mandates 480+ hours of workplace training, companies urgently require a unified, accountable operating system—not another marketing job board—to oversee the end-to-end talent lifecycle.

💡 **Opportunity:** A single system of record from first match to certified completion.

POLICY STANDARDS & PRIMARY DISCOVERY

What the Evidence Shows

Ground truth from national higher education mandates and Thai tech recruiters.

🏛️ Mandatory CWIE Policy (MHESI National Standard)

Thailand's Ministry of Higher Education, Science, Research and Innovation (MHESI) mandates strict 16-week (480+ hour) co-op programs for university graduation. Yet without a shared digital platform between universities and enterprises, companies drown in manual tripartite paperwork.

📉 The Candidate Ghosting Epidemic (JobThai HR Study)

Official recruitment intelligence by JobThai identifies candidate ghosting after offer acceptance (*"รับ Offer แล้วหาย"*) as one of the top hiring disruptions in Thailand—students hoard multiple offers with zero penalties, leaving teams stranded on start day.

🕵️ Primary Voice of Customer (25+ Thai Tech Employers)

> *"We prepared the workstation, system credentials, and project roadmap. On start day, the student stopped answering calls and ghosted us for another offer. We had already rejected all other applicants and lost our hiring window entirely."*
>
> **— Engineering Team Lead, Bangkok Software Enterprise**

🎯

HIGH RESUME VOLUME IS MEANINGLESS WITHOUT VERIFICATION AND BINDING COMMITMENT

Employers don't need 500 unvetted applicants. They need 5 pre-screened candidates who are guaranteed to show up and perform.

INSIGHTS FROM THAI WORKPLACE REALITIES

What We Learned

Three chronic operational bottlenecks paralyzing Thai host companies.

Macro Regulatory Context (MHESI CWIE)

The friction is an **institutional infrastructure gap** between Thai universities and employers, not student apathy. Both sides want successful co-ops, but lack a common digital protocol.

The Synthesis

Interviews with 25+ Thai HR directors and engineering leads revealed that the pain is continuous across all 3 phases of the internship: pre-hire, hiring, and supervision.

Key Takeaway:

Thai companies need fraud-proof screening at the gate, legally binding commitments at offer acceptance, and 1-click frictionless tracking during supervision.

1. Unverified Resume Claims PRE-HIRE DRAIN

Applicants claim proficient React/SQL skills and 3.5+ GPAs. Live coding tests reveal basic gaps, wasting 30+ screening hours per cycle because resumes cannot be trusted.

2. Offer Hoarding & Day-One Ghosting HIRING RISK

Students accept 3–4 confirmation letters concurrently as risk-free safety nets. When one team begins onboarding, the candidate disappears without accountability.

3. 400-Hour Retroactive Logbooks SUPERVISION BURDEN

Mentors face a 400-hour thick paper binder dumped on their desk in week 16, forced to sign off blindly on unverified work while filling out multi-page manual university grading rubrics.

FRICTION ACROSS THE ENTIRE TALENT PIPELINE

Our Problem Statement

A unified definition of the enterprise dilemma InternFlow exists to solve.

"Our target customers are **Corporate HR Leaders and Engineering Mentors**, who need a **unified, accountable system** to oversee the complete internship lifecycle, because **fragmented recruitment, unverified applicant credentials, last-minute candidate ghosting, and manual supervision** turn internship programs into high-risk operational burdens that derail team productivity and waste valuable leadership hours."

30+ Hours

Pre-Hire Screening Waste

Recruiters spend days verifying fabricated resumes and testing basic skills that should have been pre-screened.

100% Risk

Day-One Ghosting Vulnerability

Without a binding single-commitment protocol, every accepted offer carries the risk of empty desks on start day.

480 Hours

Unsupervised Paper Chaos

Supervisors waste productive engineering hours deciphering physical logbooks and postal university evaluation sheets.

THE 3 LIFECYCLE STAGES

How InternFlow Solves Every Stage

A chronological operating system designed around specific operational pain points.

1 **Pre-Hire Stage**
AI Transcript Screen & Match

2 **Hiring Stage**
Single-Commitment Protocol

3 **Post-Hire Stage**
1-Minute Weekly Supervision

1. Pre-Hire Stage

AI Verification & Smart Match

Direct transcript OCR extracts verified GPAs, majors, and coursework directly from university PDFs. HR sets custom match thresholds (≥80%) that automatically filter out unqualified applicants before recruiter review.

OCR Transcript Parser | Threshold Slider (≥80%) | Verified Major Badges

2. Hiring Stage

Single-Commitment Protocol

Once a candidate confirms an offer, competing applications are automatically declined and further submissions are locked. Eliminates offer hoarding, guaranteeing 100% first-day reporting and zero candidate ghosting.

Single-Commit Protocol | Auto-Decline Engine | Guaranteed Onboarding

3. Post-Hire Stage

1-Minute Drawer & Rubrics

A streamlined weekly drawer lets mentors verify hours and deliverables in 60 seconds, auto-compiling university-ready evaluation rubrics and accredited graduation certificates in a single click.

60s Inspector Drawer | 1-Click CWIE Rubrics | Certified Credentials
